givejedahand Follow

givejedahand The #Curse of #Mental #Health is #CAMH #Psychiatry. They raise hundreds of millions of dollars for bad drugs and worse hardware - and now for #supercomputers for #Artificialintelligence for Dr #Rat Brain Sean Hill to prevent #schizophrenics with over at #Krembil #Neuroinformatics. Their clinics like and including #Downtown #West (formerly Archway) are characterized by staff drinking (boozing) after hours, cheap and nasty signage, non-hygienic premises, faeces and urine at the entrances, loud and impertinent posters, theft of clients' funds (so-called "pin Monet"), impossible case loads, bureaucratic measures that are the very opposite of clientcentred, excessive drugging, excessive digital processing (for billing purposes), community treatment orders, medication errors, difficulty seeing a doctor, difficulty seeing the same doctor twice, lack of continuity, etc.etc.... Meanwhile CEO and Communicator of the Year Catherine Zahn babbles to billionaire Weiner King Michael McCain about Moon Shots and New Trajectories going Beyond the Moon. What about the Earth, Catherine? What about CAMH West or any other of your sublunary operations? You should straddle one of your own rockets like Dr Strangelove and FIRE yourself where your interests lie - obviously not with us! In the #fuckedup #streetsoftoronto with #streetphotography!
